ABOUT LABORATORY

We are an International urban laboratory uniting exceptional experts in transforming the environment that is the home of modern humanity.

Our offerings comprise solutions designed for cities, as well as for areas far beyond their boundaries. The Lab conducts analytical research and implements projects for businesses and governments alike. Our principal objective is to bring new life to territories of any scale. Fields of specialization: analytics, competitions, special projects.

TEAM

We are an interdisciplinary team of professionals in the field of territorial development and the improvement of the quality of the urban environment.

Our competent, experienced team is up-to-date on cutting-edge trends and the rigorous standards of urban planning. All members of our team are expert in their fields, and their portfolios include both large-scale projects and management experience.
